

UK CLINICS REQUIRED FOR THERAPEUTICA SUPPORT PRODUCTS

Therapeutica's unique products have been available in the UK through specialist back care centres for a number of years and are now one of the best designs available in the back and neck support global market today, helping patients overcome some of the common problems associated with acute and long term spinal back and neck pain.

Medserve, the UK Authorised Distributors are currently looking for UK Clinics (Physiotherapy, Chiropractor and Osteopathy) to recommend some or all of the Therapeutica Support Products to patients.

Ruth Milner, Director of Medserve explained "We have seen a considerable increase in orders from professional therapists over the last few months as clinicians see the benefits of recommending this product range alongside their own treatments."

Ruth continued "We are very interested in talking to UK Clinics who maybe looking to add extra income through recommending products. Our premium range has very good margins and it is not necessary to hold stock. We have produced a starter pack which includes samples and literature. We can also deliver direct to patients if required and list clinics on our website."

Therapeutica's unique products are available in five categories with different sizes; Spinal Back and Neck Support, Spinal Back Support, Sleeping Pillow, Travel Sleeping Pillow and Commuter Pillow.

For further information about the product range or about agent opportunities, please contact Ruth on 01327 310310 or email enquiries@therapeutica.uk.com
